

Granby/Victory update as of August 29, 2025

We are putting the final touches on the statement of work that will go out as a contract to Eustis, one of our construction partners, to start construction in the next few weeks. The statement of work includes construction of about 25 miles of fiber to Victory and to Granby, coming from our equipment cabinet in Concord. The statement just needs a USDA quick review (USDA is who gave us the ReConnect grant to cover most of Essex County). We anticipate being able to offer service by the end of this year.
